## Message From James S. Gavrilos, CFRE

Dear Colleagues:

In 1972, the crew of Apollo 17 took this picture... among the most famous pictures of the earth in history. Prior to seeing this photo ("The Big Blue Marble"), for most of us, our "world" was our home...our neighborhood...our city...our state...our nation. But when we took a step back and saw the "big picture", perspectives around the world were transformed. And this is precisely what an annual report does...It allows us to step back and see the big picture.

In 2018-2019, we...

- increased the number of schools we serve at Red Apple Supplies from 32 to 43.
- distributed \$610,000 of school supplies through Red Apple Supplies.
- increased the number of GoTeach! Grants from 40 to 62.
- received a grant from JPMorgan Chase to establish a Fire Science Academy at Palm Beach Lakes H.S.
- were awarded a Four-Star Rating from Charity Navigator for the first time.
- partnered with the SDPBC and Comcast to host the Annual Principal of the Year Celebration.
- partnered with the SDPBC, Publix Supermarkets and the United Way for the annual Tools for Schools.

When seen "from a distance" ...2018-2019 was an incredible year for your Education Foundation. We owe our success to the incredible support of Superintendent Dr. Fennoy, the seven members of the School Board and our own Board of Directors. In addition, our staff of seven continues to demonstrate the highest levels of professionalism and dedication on a daily basis. Our Champions of Education generously support our work with their commitments of time, talent and treasure. Our volunteers shoulder the heavy burden of moving thousands of pounds of product through our Red Apple Supplies. But we do it all...and will continue to do it to support the students, teachers and schools in the finest school district in the State of Florida.

So, take a step back...and enjoy the "view from a distance..."

With respect,

James S. Gavrilos, CFRE

President/CEO: Education Foundation of Palm Beach County

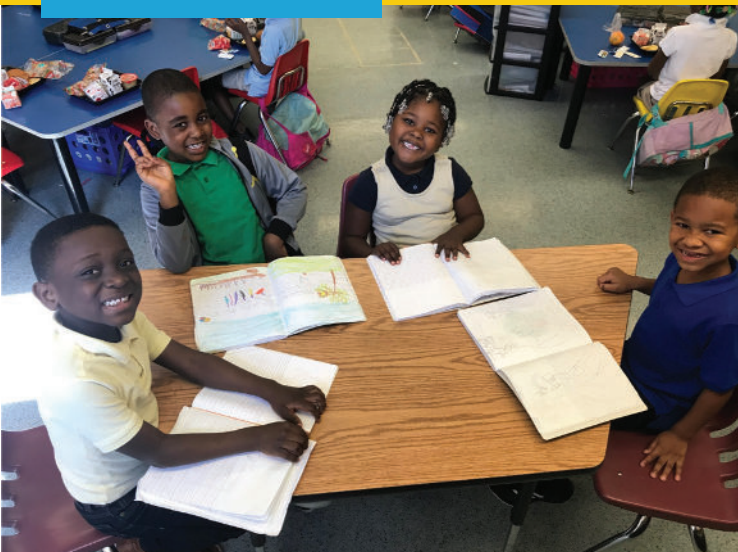

## ► MISSION:

We are the nexus of Palm Beach County's public-school system, the private sector and the community.

We facilitate student achievement by supporting high-quality public education through partnerships, grants, events, and public awareness.

### RED APPLE SUPPLIES

## School District Matching Grant Programs

### SIGNATURE PROGRAM

#### RED APPLE SUPPLIES

The Education Foundation of Palm Beach County completed the third full year of operations for its signature program, Red Apple Supplies (RAS). RAS is a resource store that provides teachers with FREE school supplies for students attending designated Title 1 schools. Since opening its door, RAS has distributed over \$1 million in free supplies.

#### ► Impact:

- 28,000+ students and 43 schools served
- \$610,000 in FREE school supplies distributed
- As a result, teachers reported that students:

Earned better grades **60.17%**

Improved attendance **35.93%**

Displayed better behavior in the classroom **74.46%**

Maintained a more positive attitude or increased confidence **92.21%**

Learned in a more equitable classroom environment **86.58%**

## GoTeach! CLASSROOM GRANTS

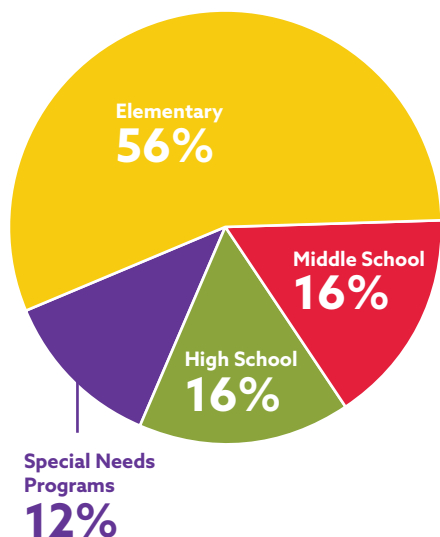

**Funded by: Great Charity Challenge, SRG Technology, the "Support Education" License Plate Program and School District Education Foundation Matching Grant Program through The Consortium of Florida Education Foundations.**

The Education Foundation of Palm Beach County's GoTeach! Classroom Grants encourage educators to create innovative and exciting educational opportunities for their students. GoTeach! Classroom Grants focus on these priority areas: Literacy, Career Education and STEAM (Science, Technology, Engineering, Art and Mathematics). The typical GoTeach! Classroom Grant ranges from \$225 - \$775 (for individual teacher proposals) to \$1,000 (for team proposals).

### ► Impact:

- \$67,000 awarded to fund 62 grants
- 40+ schools served
- 14,000+ students impacted
- 100+ teachers supported and 95% of teachers reported an increase in teacher quality as a result of their grant participation

### GoTeach! Classroom Grant Demographics

## MULTISENSORY STRATEGIES

### CHARGING FORWARD WITH MULTISENSORY STRATEGIES

**Funded by: Ventus Charitable Foundation and the School District Education Foundation Matching Grant Program through the Consortium of Florida Education Foundations.**

This program was designed to align with The School District of Palm Beach County's Strategic Plan to provide effective and relevant instruction to meet the needs of all students and to increase the number of students reading on grade level by 3rd grade.

In collaboration with the University of Central Florida's Morgridge International Reading Center, the School District of Palm Beach County has trained district administrators and teachers in research-based instructional strategies that developed the capacity for teachers to impact the quality of their instruction. In its second year, this pilot reading program served 4 schools. Instructional strategies were used to improve students' reading proficiency in primary grades with language-based learning disabilities, including students with characteristics of dyslexia.

► **Impact:**

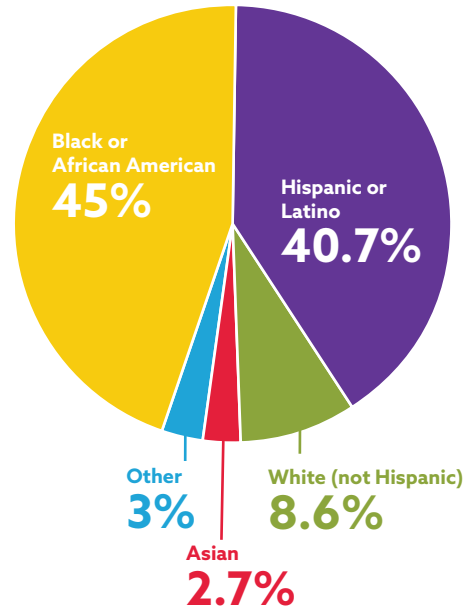

- 988 students and 4 schools served
- 47 teachers and 10 administrators trained in research-based strategies
- 100% of teachers reported an improvement in teacher quality as a result of participating in multisensory instructional strategies training
- 81% of Kindergarten and 90% of First Grade students demonstrated mastery on their Reading Running Record Year-End Assessment

**CLOSING THE ACHIEVEMENT GAP WITH AVID**

***Funded by: Bank of America and the School District Education Foundation Matching Grant Program through the Consortium of Florida Education Foundations.***

The AVID System (Advancement Via Individual Determination) is a district-wide academic and graduation improvement initiative supported by the Education Foundation of Palm Beach County based upon its superior student outcomes. The AVID program's mission is to close the achievement gap by preparing all students for college readiness and success in a global society. AVID has proven results in 56 local elementary, middle and high schools resulting in grade and credit improvement, higher graduation rates among under-performing gender and racial groups, and more students enrolled and persisting in post-secondary education. This program provided essential training to AVID elective teachers and district/school leaders to ensure that research-based instructional strategies were taught in AVID electives and in AVID schools in order to prepare first-generation college-bound students for graduation and post-secondary success.

**AVID Senior Demographics**

► **Impact:**

- 60,000+ students and 56 schools served
- 700 teachers and administrators trained in research-based instructional strategies
- 100% of AVID Seniors graduated in the Class of 2019
- Conniston Middle School was deemed the first National Demonstration School in South Florida.

## HEALTHCARE INNOVATION

### HEALTHCARE INNOVATION PROJECT

***Funded by: The Quantum Foundation and the School District Matching Grant Program through the Consortium of Florida Education Foundations.***

In an effort to foster post-graduate success, the Healthcare Innovation Project was designed as a collaborative effort between the School District of Palm Beach County and the Education Foundation of Palm Beach County. This project provided 13 Medical Sciences Academy Programs with cutting-edge diverse clinical patient simulators that teachers and students programmed with “pre-existing medical conditions”. This cutting-edge equipment provided students with hands-on learning opportunities, allowing them to fulfill the clinical experiences required to receive industry certifications in order to become professional healthcare providers.

### ► Impact:

- 4,500+ students and 13 schools served
- 42 teachers trained
- Based on preliminary results, 99% of Medical Academy students successfully passed and earned an industry certification prior to high school graduation, allowing them the opportunity to seek and/or obtain employment in healthcare and/or STEM-related careers
- Industry Certifications Included: Emergency Medical Responder, Certified Medical Administrative Assistant, Certified EKG Technician, Certified Patient Care Technician, Certified Pharmacy Technician, Certified Nursing Assistant and Certified Personal Trainer

### ROCKET POWERED ROBOTICS

***Funded by Aerojet Rocketdyne Foundation and the School District Education Foundation Matching Grant Program through the Consortium of Florida Education Foundations.***

The Rocket Powered Robotics program supported teams competing in the FIRST LEGO League and FIRST Tech Challenge Robotics programs in Palm Beach County. This program produced champion design teams rooted in the disciplines of STEM education. It provided targeted support to teams with participating students from over 14 district schools. One middle and high school in the far western Glades community, where access to robotics clubs drastically improved STEM participation and interest in STEM-related careers, was also supported through this program. The goal of this program was to provide students access to robotics education that stimulated knowledge and developed critical thinking skills. This was centered on principles of technology and engineering through opportunities allowing students to work cooperatively as a team to problem-solve and compete in FIRST Lego League Competitions.

### ► Impact:

- 4 robotics teams, 100 students and 16 teachers served
- The Children of the Swamp team competed at the World Championship where they won in their division and placed 4th overall
- M.A.R.S. (Mega Awesome Robotic System) competed at the Orlando and South Florida Regional Competitions and were selected as members of an alliance in both competitions
- Pahokee Middle School, the Subaroos, caught the attention of the University of Washington and even NASA!

### STEPPING UP STEM IN PAHOKEE

***Funded by: Ventus Charitable Foundation and the School District Education Foundation Matching Grant Program through the Consortium of Florida Education Foundations.***

Stepping up STEM in Pahokee helped create a pipeline of Computer Programming/Robotics and Marine & Environmental Science course offerings in order to increase skill development and opportunities for middle school students. The change in school curriculum challenged students with more complex concepts that most closely resemble what is currently being used by today's professionals in STEM fields. These opportunities prepared students for success in STEM courses and increased student interest in STEM-related careers.

### ► Impact:

- 144 students and 3 teachers served
- New Marine and Environmental Science courses provided for students

## Foundation Supported Programs

### FIRE SCIENCE ACADEMY AT PALM BEACH LAKES COMMUNITY HIGH SCHOOL

***Funded by: JPMorgan Chase & Co.***

The Fire Science Academy at Palm Beach Lakes Community High School is a newly developed, 4-year Career and Technical Choice Academy providing students the opportunity to graduate with a high school diploma and earn two industry certifications (Firefighter I and Emergency Medical Responder) leading to opportunities for post-graduation employment.

The Fire Science Academy also provides the pathway and preparation for entry into post-secondary fire academies, with a matriculation agreement in place for eligible students to transition smoothly into the Fire Academy at Palm Beach State College. In addition to providing non-college bound students with the opportunity to train for a sustainable career, this program will increase the diversity in local fire departments by encouraging minority students to train for a career in this field.

### ► Impact:

- 55 students served and anticipated enrollment of 30 additional students each year
- Students received hands-on training (including local ambulance ride-along, fire engine simulation training, advanced patient clinical simulators)

### FIRE SCIENCE ACADEMY

## LEADERSHIP AND EDUCATOR COLLABORATIVE

**Funded by: The Jim Moran Foundation**

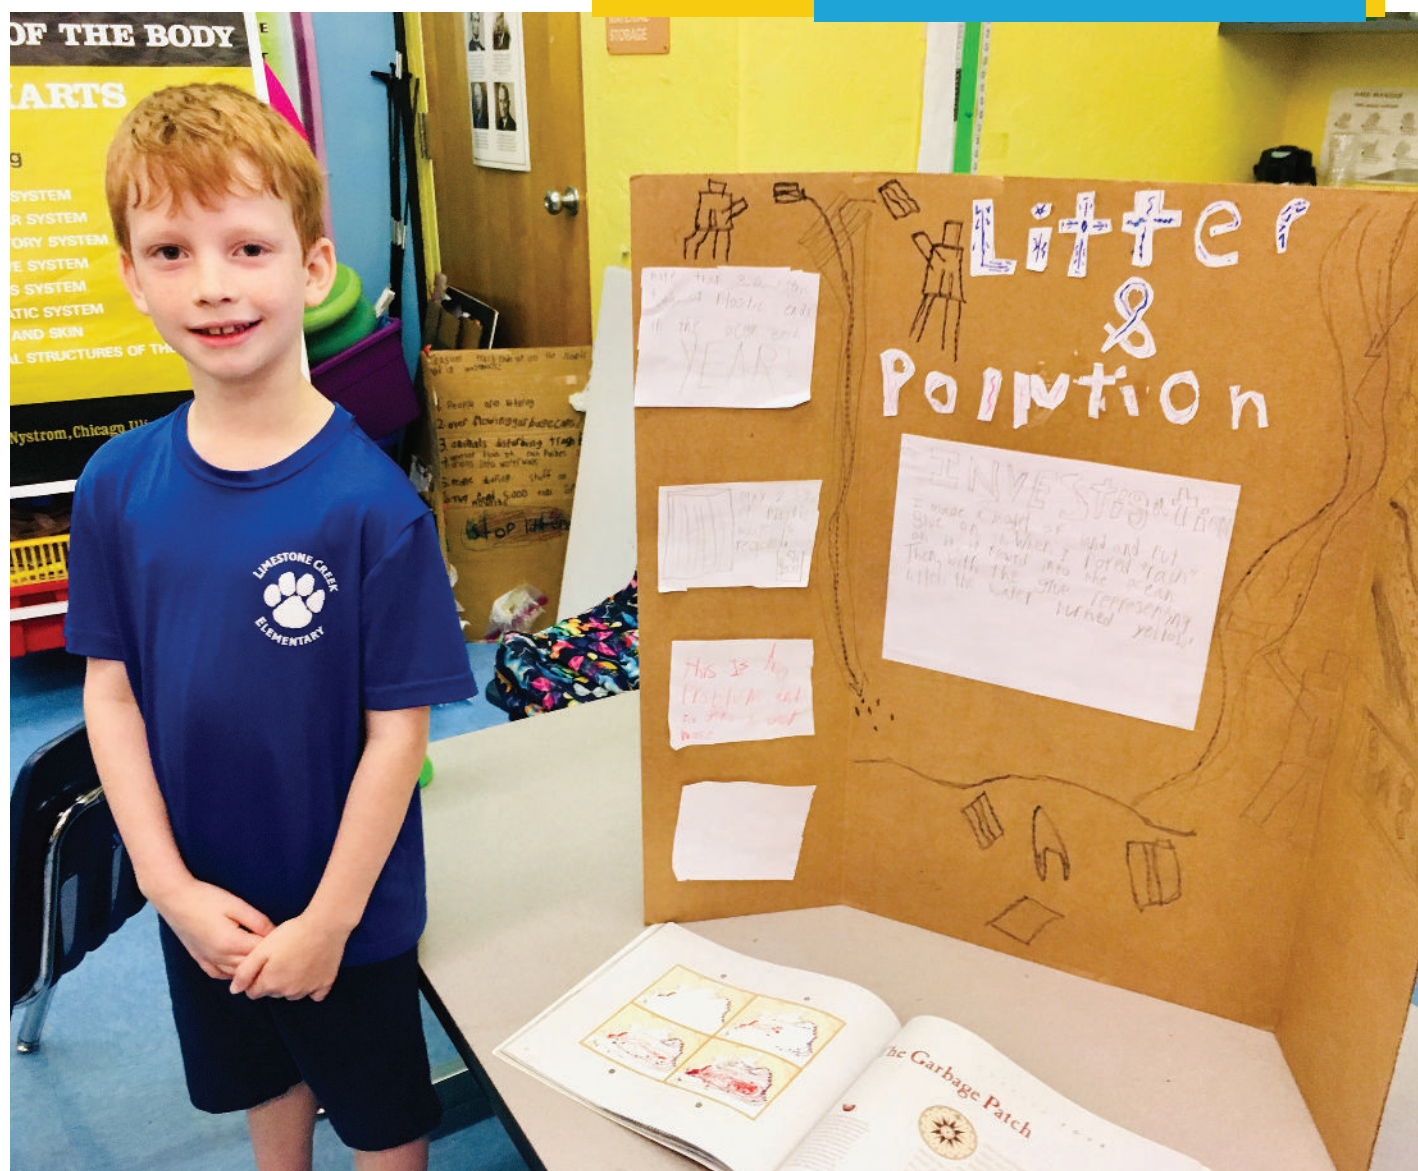

The Leadership and Educator Collaborative provided teachers, administrators and school district leaders professional development and specialized training on a student-centered pedagogy, Project Based Learning. Participants learned how to develop critical thinkers through engagement of

students in more authentic learning that required solving real-world problems through a series of trainings held at The Conservatory School at North Palm Beach.

### ► Impact:

- 258 teachers, administrators and community leaders trained
- 9 schools served
- 4,500 students impacted

## EMPOWERING STEM EDUCATORS

## EMPOWERING STEM EDUCATORS

**Funded by: Florida Power & Light Company in partnership with Aerojet Rocketdyne Foundation.**

The purpose of FPL's EmPOWERing STEM Educators program is to increase teacher knowledge of effective math and science instructional practices which align with Florida Standards. This professional development program took place at The Conservatory School at North Palm Beach. These trainings provided teachers throughout the school district the opportunity to engage in peer-to-peer learning of highly effective instructional techniques.

### ► Impact:

- 93% of participating teachers reported that this program gave them the opportunity to observe and learn from highly effective peer teachers in STEM (Science, Technology, Engineering, Math) related subjects
- 43 teachers trained from 10 participating schools

## CONNECTING SOCIAL JUSTICE & STEM USING GIS AT VILLAGE ACADEMY

**Funded by: Motorola Solutions Foundation in partnership with Aerojet Rocketdyne Foundation.**

Through the use of Geographic Information System Technology (GIS), students were able to create solutions for real world challenges that impact their own community. Students used state-of-the-art 21st Century Technology to drive their inquiry-based learning using ESRI (Environmental Science Research Institute) ArcGIS Technology. Students were tasked to choose from two tracks: Environmental or Health & Safety. Using ArcGIS Technology gave them a broader perspective in these two subject areas which helped them to understand ESRI's Trademark of the "Science

of Where". Students learned first-hand how to leverage multiple pieces of software tools to fully comprehend the power of GIS which, in turn, helped them learn how to provide solutions to help their community address the Drug/Opioid Epidemic crisis and Explore the Green Infrastructure. This program incorporated engineering, IT concepts, public safety elements and vocational skills, and provided information to help students ultimately obtain their industry certification in IT/GIS areas. The project targeted under-represented groups - primarily students living at or below the poverty line, minority students and females.

Students attended multiple field trips as well as participated in presentations at the school to help them understand what it means to choose a career in STEM through the use of GIS Technology.

### ► Impact:

- 71 students served
- 81.5% of participating students increased STEM-subject grade by one full letter grade

# IN THEIR OWN WORDS . . .

## Teachers and Principals Share the Impact of Supplies and Support Received from Red Apple Supplies

*"One of my students could not afford the necessary supplies and lacked confidence in his academic and learning abilities. With the help of Red Apple Supplies, he now feels more included, participates more and has since increased his learning gains."*

**Vondredi Myrtil, 2nd Grade Teacher,  
Dr. Mary McLeod Bethune Elementary**

*"One of my students is homeless and he kept coming to school without a book bag and supplies. It took the burden away by being able to take him to my closet to pick out a bag and his supplies. It made him feel at ease and helped erase the pain and suffering he was experiencing. Thank you Red Apple Supplies."*

**Lavinia Draper, 3rd Grade Teacher  
U.B. Kinsey/Palmview School of the Arts**

*"One of my newcomers (student new to the country with no knowledge of the English language) was able to read a Spanish book I had received from Red Apple Supplies. When I handed it to him, his eyes lit up and he was so proud of himself for being able to read because it was in his native language."*

**Elizabeth McManus, 3rd Grade Teacher  
South Grade Elementary**

*"It is certainly a wonderful opportunity for Village Academy to be able to partner with the Education Foundation's Red Apple Supplies program . As the Principal , I know for a fact that teachers are extremely grateful knowing that they have a place to go to fill carts with items that make teaching that much easier. We say it all the time that teachers give of their own money, extra time and buy additional items to ensure that students have the best*

*teaching experience. I say that this program really brings it home when it comes to actionable support. The Red Apple Supplies program is just that- one stop shopping for teachers . It is simple and practical and the store really equips teachers with supplies that are needed not only for teachers but for students as well. Due to this program not one student goes without a supply item. What's even more unique about this program is that it goes beyond your basic supplies such as pens, pencils, and paper and supplies teachers with other items to enhance instruction such as books, seasonal decorations, arts and crafts supplies and beyond! The Red Apple Supplies Store is the "apple" of every teacher's eye, especially at Village Academy!"*

***Latoya Dixon, Principal at Village Academy on the Art & Sara Jo Kobacker  
Campus in Delray Beach***

*"I have multiple students that are homeless or come from war-stricken countries. The supplies they come in with are basically the clothes on their backs. Red Apple Supplies allows me to supply these students with backpacks, folders, pencils and other supplies to allow them to have the same capabilities of succeeding in the classroom without feeling like they are at a disadvantage."*

***Taylor Papaiani, 2nd Grade Teacher  
Barton Elementary***

*"A student in my first period class became homeless. He would generally come to class without supplies because he didn't have any and was embarrassed to ask for some. I placed supplies out for all students to use and he was able to retrieve his supplies upon entering the class without having to ask for them. His grades improved as a result of having supplies available in class courtesy of Red Apple Supplies."*

***Cassandra Thomas, 10th Grade Teacher  
Riviera Beach Preparatory Achievement  
Academy School***

# EXPANDING IMPACT IN THE COMMUNITY

## Medical Academy Student from Boynton Beach High School Saves a Life

Sarah VanRoekel, a senior at Boynton Beach High School, is credited with saving a man's life- all because of her high school medical training. Sarah was working at her part-time job at Chick-fil-A when she saw a customer go into cardiac arrest. She began CPR immediately and continued until Boynton Beach Fire Rescue arrived on the scene. Her efforts made all the difference! Sarah learned CPR training while enrolled in the Medical Science Academy at Boynton Beach High School. Her future goal is to attend medical school, and she is off to a great start! Sarah says that she "was drilled so well into the protocol" by her training at school that she "didn't even think twice" about what she should do. Her education, and the confidence to use it, literally saved a life.

## Fire Science Academy Sparks Goals for the Future

### NIKAYSIA MENDEZ

*Palm Beach Lakes High School*

**Fire Science Academy Student shares experience in**

**the program and plans for the future:**

"I want to thank JPMorgan Chase and Co. and the Education Foundation of Palm Beach County for this amazing opportunity to be able to participate in the Fire Science Academy at Palm Beach Lakes Community High School. The

experience that I am gaining from this academy is awesome and the information I'm learning will help me in my future career as a firefighter. I think it is spectacular being able to learn all the things I have since I started the program. I know I will be able to use this experience for the rest of my life. I thank you for investing in my education and my future."

**Program Sponsored By:** JPMORGAN CHASE & CO.

## Pahokee Middle School Students Making their Mark in the Science Community

NASA shows interest in the work of students learning robotics and coding through STEM programs funded through the Education Foundation of Palm Beach County, Ventus Charitable Foundation, Aerojet Rocketdyne Foundation and the School District Education Foundation Matching Grant Program through the Consortium of Florida Education Foundations.

The students on the Subaroos Robotics Team at Pahokee Middle School found a way to treat kidney stones in space,

one of the big problems facing NASA astronauts. After creating the idea, the students received input from researchers at the University of Washington.

One of the students at Pahokee Middle School, Alondra Campos, shared, that "Robotics impacts my life, future

career plans, and aspirations for college. Before I was in robotics, I wanted to become an anesthesiologist, but now I want to be an engineer to be able to build devices that can help people. Robotics has changed my point of view because I can create robots that may assist the doctor when doing surgery or can create robotic arms that can connect to the nerves in the brain. A place I would want to work at is NASA because they inspired me in many ways by the support they gave to us to create our project to destroy kidney stones from the body." Alondra and other students participating in this program are now future scientists in the making, all because they were given the opportunities to explore, create and learn through a grant supported by the Education Foundation of Palm Beach County and the philanthropic and business community. This is one of the many success stories that are possible when the community rallies to support education in Palm Beach County.

**Program Sponsored By:**  
Ventus Charitable Foundation

## Palm Beach Lakes Community High School Student Prepares for College

**SUHAILY AUGUSTIN**  
*Palm Beach Lakes  
Community High School*

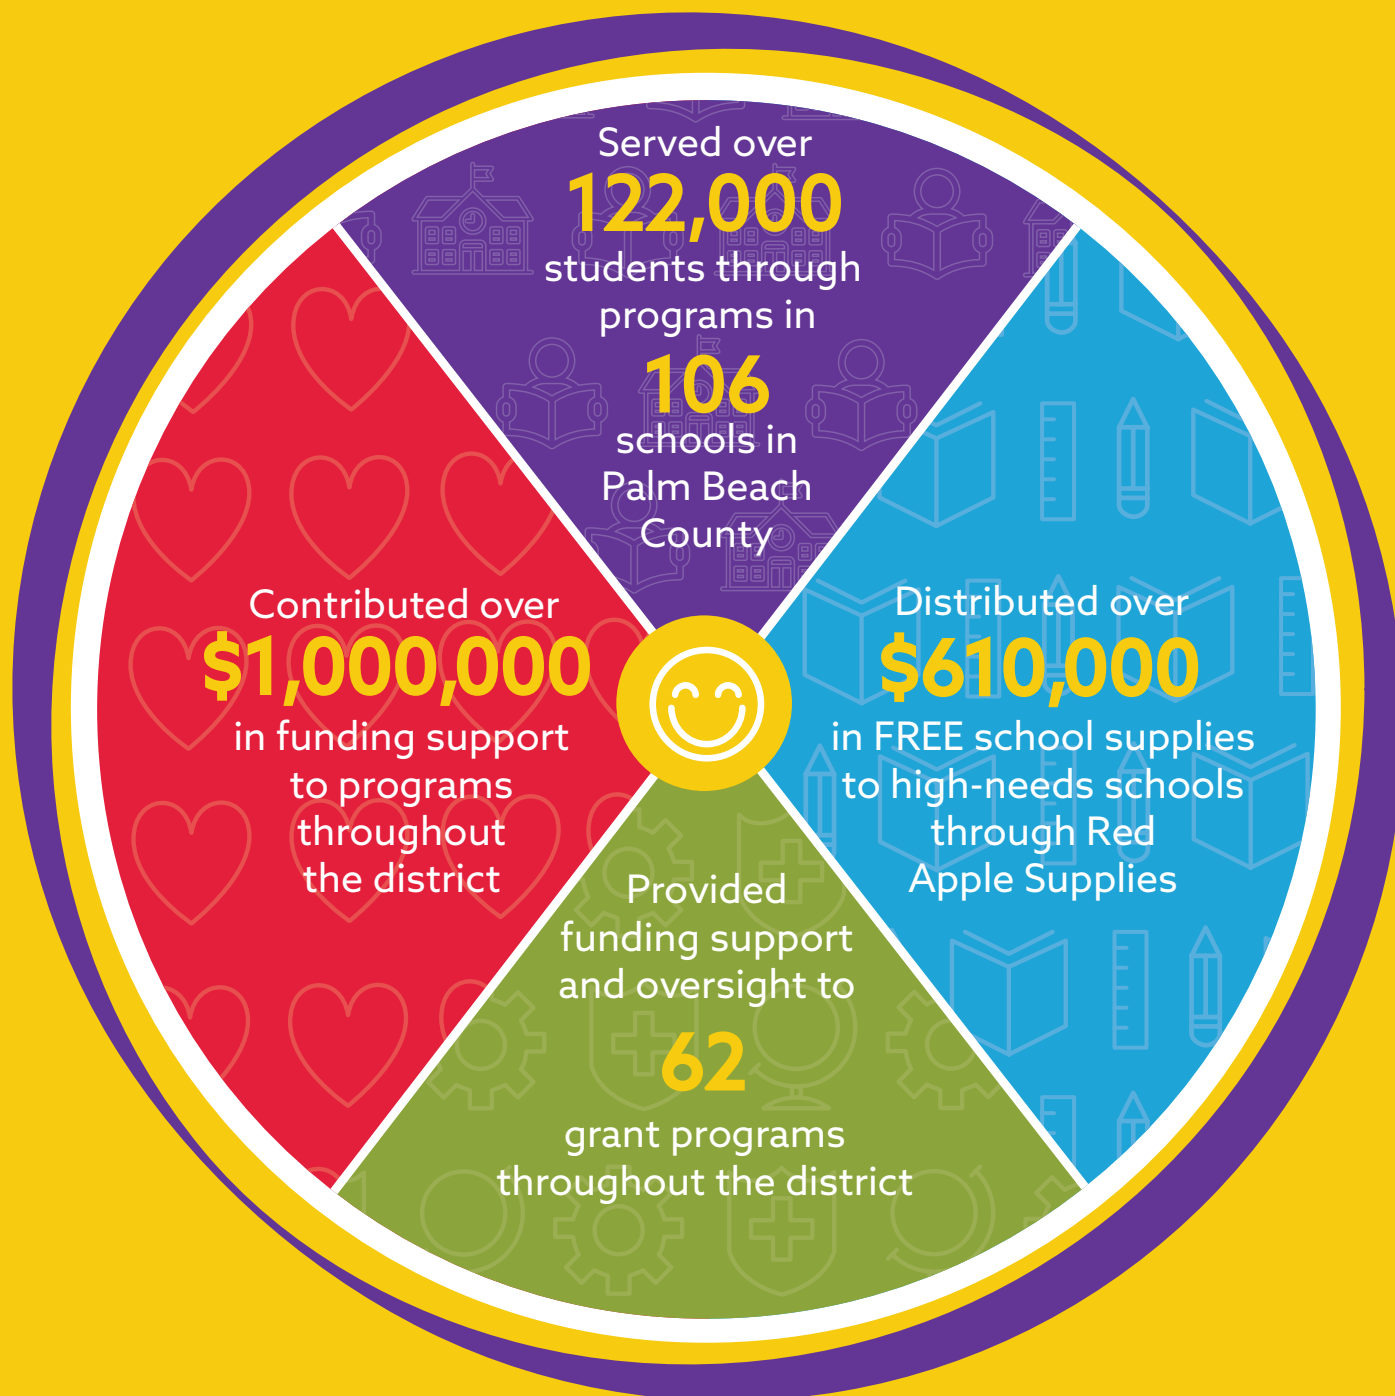

"From the very first day that I was enrolled into my AVID class, I knew how serious the preparation for a college education is. My teachers surrounded us with advice and tips to make

our lives easier when we enter college. I would most definitely recommend the AVID curriculum to anyone who is serious about succeeding in college academically. Those who are passionate or interested in furthering their education after high school will find many benefits when enrolling into this curriculum. AVID has also brought me an opportunity like no other in all my years in high school, to go on an actual college tour. I was able to go to different colleges and universities in my state which enabled me to expand my knowledge on the educational institutions around me. For this, I am very grateful."

**Program Sponsored By:** Bank of America

# School District Education Foundation Matching Grant Program Information

Through the collaborative effort of its members, the Consortium of Florida Education Foundations (CFEF) successfully advocated for the creation of legislative matching funds in 2000 which has provided a dollar-for-dollar incentive for local education foundations to raise private contributions for eligible projects. Since then, nearly \$102 million in combined private and state dollars have been employed for local projects that serve low-performing students and literacy initiatives, encourage STEM and career/technical education, improve teaching quality, and/or increase graduation rates.

The CFEF is the membership organization for Florida’s school district-wide local education foundations. Established in 1987, the CFEF maximizes the individual and collective strength of

Florida local education foundations to support local partners and schools in achieving student success. The CFEF now has 64-member foundations with 1,200 business and community leaders serving as volunteer board members. Collectively, they raise \$64 million annually to support students, teachers and schools through a variety of programs. The CFEF has facilitated more than \$51 million to local education foundations since 2002 through various private- and public-sector partnerships, including the State of Florida School District Education Foundation Matching Grant Program.

To learn more about the CFEF and the statewide impact of the program, visit [educationfoundationsfl.org](http://educationfoundationsfl.org).

# CHAMPIONS of EDUCATION

*invest in today's students as tomorrow's leaders*

Business and philanthropic leaders across Palm Beach County recognize the need to get involved and make a difference. The Education Foundation encourages these business and philanthropic leaders to become Champions of Education. The Champions of Education Program is a comprehensive approach that recognizes contributions of time, talent and treasure from businesses, organizations and foundations. Our goal for our Champions is a "full circle" experience. Our Champions commit their annual financial support that mirrors their outreach goals. In addition, they have the opportunity to volunteer at the Education Foundation's Red Apple Supplies Store to see first-hand the difference they are making. And finally, our Champions have the opportunity to network with other business and philanthropic leaders as well as senior school district administrators at a variety of events. When the community comes together to support our schools...we build a better Palm Beach County.

We sincerely thank our Champions of Education who joined us in 2018-2019 to support high-quality education. You are the engine of transformation! Today's student is tomorrow's leader!
