Help build the future for our students, teachers, schools, and our community...
Brick by Brick, Mind by Mind.

The Education Foundation is expanding its capacity, helping to ensure that every public-school student and teacher in Palm Beach County will receive the resources they need to unlock their hidden potential and strengthen their skills for a bright future.

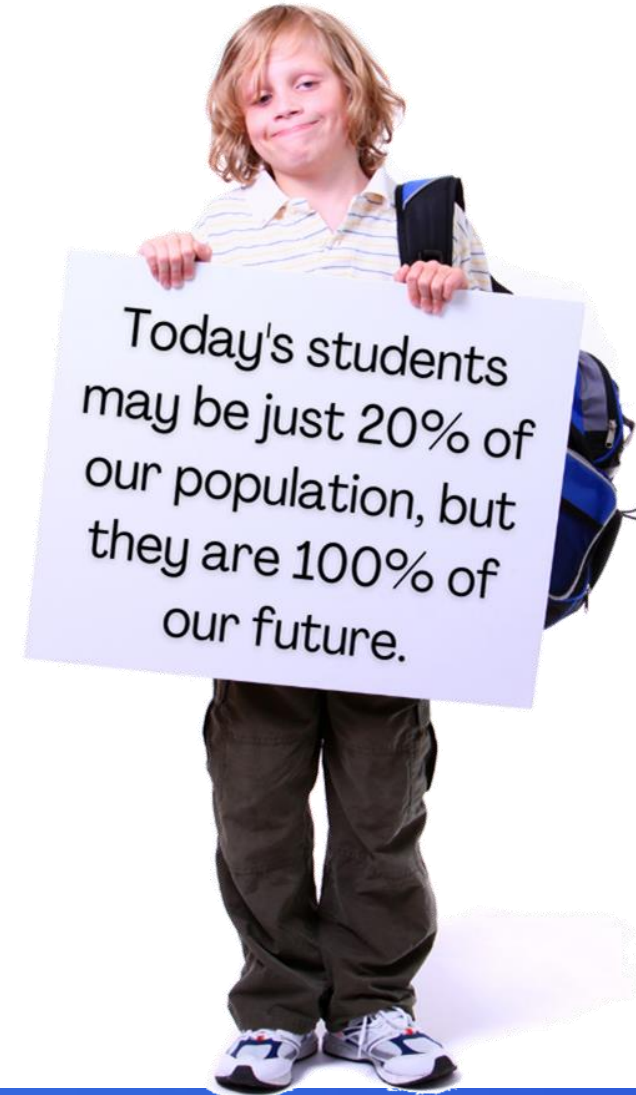

EDUCATION
FOUNDATION
OF PALM BEACH COUNTY

The “Why”

Like bricks stacking upon bricks, knowledge is built. Children must first learn the “ABCs” in order to read and must learn to read to allow them to write, research, and reason. Learning is construction – knowledge building upon knowledge.

The Education Foundation of Palm Beach County empowers public education by supplying the builders – the district’s schools and educators – with the essential materials required for the task. From grants and scholarships to desperately needed school supplies and resources from our signature Red Apple Supplies program, the Education Foundation enables this vital development of more than 180,000 student minds, representing the near future of our community.

This future needs us – and you – right now. Your generosity and civic-mindedness will enable our schools to build the future that we and our students deserve – **brick by brick, mind by mind**
